

# System WL 400

## with Processing Unit EC 120

Dynamic - Axle by Axle

Very compact WIM system to weight many vehicles in a short period of time. Ideal for pre-selection and semi-fixed installations. The system offers a very big active weighing area and possibility to print out the results. No need of power supply. Connections are made with cables.

### The system is composed of:

- 2 sensors WL 400
- 2 levelling mats 2.8 m
- 2 levelling mats 3.8 m
- 1 aligning frame
- 1 processing unit EC 120
- 2 cables (different sizes available)
- 2 chargers E 7084.x
- 2 termination plugs
