

System WL 400

with Software EC 200

Very compact WIM system to weight many vehicles in a short period of time. Ideal for pre-selection and semi-fixed installations. The system offers a very big active weighing area and possibility to print out the results. Connections are made with cables.

The system is composed of:

- 2 sensors WL 400
- 2 levelling mats 2.8 m
- 2 levelling mats 3.8 m
- 1 aligning frame
- 1 interface box E 9023.0
- 1 PC with Software EC 200 and printer*
- 2 cables (different sizes available)
- 2 chargers E 7084.x
- 2 termination plugs

* PC and printer are not supplied by HAENNI
